Personal interests

Family and friends, travel, golf, skiing, sailing, and diving in warm seas.

PROFESSIONAL EXPERIENCE

1985 - 1985, Perstorp Administration AB, Perstorp, Malmö, System Developer, Converter

Project employment (a seven-month break from studies) which initially involved a conversion from IBM's DOS/VSE to MVS/XA at IBM's Malmö Converting Centre (MCC). Also helped implement the newly converted system in Perstorp, as well as carrying out the scheduled test procedures.

1986 - 1986, Sandvik Information AB, Singapore, Trainee

International internship in Singapore for 2 months, where the tasks consisted of documenting the regional (Southeast Asian) changes in the global internal administrative system. Development of a system for users to ask their questions; a database of Q&A was created. This was due to the IT manager leaving, and thus ensuring a secure handover to the local staff.

1988 - 1992, Commentor AB, Lund, Project Manager, Key Account Manager, Trainer.

Was initially hired as a customer trainer for the administrative module system. However, quickly advanced to a position as project manager at the company's largest client, with the task of further developing systems, planning test documentation, primarily for the financial modules (accounting, subsidiary ledgers, project accounting and MA routines), as well as building up a functioning operations and training organization

1992 - 1995, Lever AB, Stockholm, Department Manager for SAP, Project Manager

The main task was to get a functioning OA (Office Automation) up and running as preparation for the implementation of several specific Lever Europe systems, video conferencing, Notes, and reporting systems. Project management with analysis and planning for the implementation of SAP R3, where Lever Nordic (Sweden, Denmark, Finland) was the first of 17 countries. 6 months in Port Sunlight/Leeds, UK, in standardization project work on SAP within Lever Europe together with staff from Holland and the UK.

1995 - 2000, TietoEnator AB, Stockholm, Department Manager for SAP, Investigator, Project Manager.

Project management and business development as the main focus, with a number of major corporations from the business sector on my track record, Föreningssparbanken, Ericsson, Tele2, SAS, among others. Was responsible for the partnership with SAP and built up the unit within TietoEnator. Was responsible for TietoEnator's initiative in SAP in Sweden, first in Stockholm and then in Malmö. Coordination as well as contacts with customers and partners to create business opportunities. Responsibility for the initiative initially meant becoming a partner to SAP (which we became in 1998).

2000 - 2002, IconMedialab AB, Malmö, Business Management Consultant, Researcher, Project Manager.

Management consultant focused on clients whose goal has been to increase customer value by means of the internet as a new channel to the market. Business and project management for private and public sector organizations, e.g. business and project management for Öresundskraft.

2002 - 2004, SPENNER Consulting, Malmö, CEO, Management Consultant, Project Manager.

As a consultant, provide services to clients with a focus on management consulting, project management, process development.

2004 - 2006, Teleca Software Solutions AB, Lund, Malmö, Senior Project Manager

Led software development projects with international teams and delivered to customers in the mobile phone industry. The solutions were based on a foundation of developed modules owned by Teleca, which were adapted and integrated into the mobile phones for various customers.

2006 - 2012, Sony Mobile (SonyEricson), Lund, Customer Service Consumer Portfolio Manager, Head of Customer Service Planning, After Sales Planner, Project Manager, Business Relation Manager (BRM)

As a start After Sales Planner, then Head of Customer Service Planning, to Consumer Portfolio Manager – roles that revolved around project management, planning, and a better customer experience after sales. Led customer service portfolio strategy, integrating self-service solutions and after-sales planning.

Coordinated global customer service operations, enhancing efficiency and customer satisfaction.

Managed cross-functional teams delivering innovative consumer support solutions.

Subsequently Business Relationship Manager (BRM) with full responsibility for the budget within the IT department and responsibility for Purchasing, Customer Service, and Logistics.

2012 - 2026, Ørsted, Copenhagen, London, Senior Chief Project Review Manager, Investment Appraisal Manager

Responsible for investment appraisals and decision support for Executive team. All wind power installation (offshore) investments were reviewed by the department. Compiled a report to Executive team noting the status of the investment, such as risks, delivery time, safety, etc.

Initially, I was responsible for conducting project reviews of all installation projects together with a team of internal specialists, where we verified that the projects met the requirements and criteria needed to pass a decision gate and proceed to the next phase of the project.

The project model is based on the Project Management Institute (PMI), and I took part in adapting the organization's model as well as teaching certain parts of it. Also carried out process improvement work and collaborations with the various departments from the finance department's perspective.

2026-08 - , SPENNER Consulting, Malmö, CEO, Management Consultant, Project Manager.

As a consultant, provide services to clients with a focus on management consulting, project management, process development.

Also supplemented this with 10 credits of mathematics.

CONSULTING EXPERIENCE

1989 - 1993, TeleLarm AB, Stockholm, Project Manager

Assignment to further develop the system, and to plan test documentation, primarily for the financial modules (accounting, accounts receivable/payable, project accounting, and MA routines), as well as to build up a functioning operations and training organization. The equipment fleet consisted of 21 IBM RT machines deployed across the entire country, communicating via Televerket's X.25 network DataPak, of which 2 were located in Stockholm at HQ, where all invoices, ledger postings, and stock orders were replicated. 1

1995 - 1995, Tele2, Stockholm, Project Manager

Hired as a product coordinator by CallingCard (a telephone service linked to credit cards). The assignment involved further developing the invoicing system and coordinating operations around the product as well as the staff involved. Discontinuation of unprofitable cards together with the salesperson, after we had conducted a basic income/cost analysis and compiled statistics, in order to be able to present a proposal for a continued strategy. 1

1996 - 1997, Ericsson Network Business (EBC), Stockholm, Project Manager

Project Management for development of RAPS (Radio Planning System). New handling of wireless network (DECT) within urbanized areas. Pilot customer was a big telecom company in UK. 1

1997 - 1998, SAS, Stockholm, Project Manager

Project manager for the launch of a new product/service/concept to the most loyal customers and frequent flyers. Coordinated marketing processes, both external and internal, and got everything and all processes in place before the launch, and coordinated with alliance partner airlines. Trained cabin crew and ground staff at all airports. Planned and implemented the program services for a new tier of Eurobonus card for the frequent flyer and loyal customer group, both SAS and Diners cards (co-branded). 1

1997 - 1998-03, Swebank, Stockholm, Project Manager

Started by developing a quote and prototype for a new customer support system for the bank branches in their new platform GP2000. During the summer and autumn, I started up a project for their Backoffice functions for the same platform. The goal was to introduce a new client/server system. In October 1997, I moved over as project manager for their intranet solution named Kanal1. The main functions were e-mail, forums (discussion groups), case management, and search/document management. The external information website was also included in the business area. The project was at a stage of going into production as well as preparing version 2 of Kanal 1. During this period, there was enormous pressure on development in the web area, in order to be able to spread information in the two merging banks. 1

1998-03 - 1998-04, SAS, Copenhagen, Project Manager

Project review of AMS (Airport management system). A short assignment to help the client obtain an objective basis for choosing a solution/system before making a purchasing decision. 1

1999-01 - 2000-04, AssiDomän – Förenade Well, Eslöv, Project Manager

Project manager for implementing a new in-house develop and process oriented ERP system for the core business. Kappa Förenade Well is situated in three different locations. The project involved nearly 50 project members within a time period of 2 years. The systems objective was to support and optimize the business processes. The project was divided in 7 subprojects – change management, development, migration, integration, documentation, implementation and maintenance. 1

2000-04 - 2000-09, Ericsson Mobile, Lund, Project Manager

Project Manager for a feasibility study for next generation of internet solutions supporting employees, partners and customers. The project goal was to centralize all web applications and use SAP as data-store for all applications. Also implement a "single sign on" system. 1

2001-04 - 2001-11, Öresundskraft, Helsingborg, Business Area Manager, Senior Project Manager

Establish business opportunities for a Metropolitan Area Network (MAN) in Helsingborg. Öresundskraft is investing in building a fibre-optic network and needed help with project management as well as creating business opportunities with its network. A very inspiring and challenging project with entirely new market conditions. My task was to support management as well as to build relationships with suppliers, property owners, and end customers. 1

2001-09 - 2002-08, ASPERITY, Malmö, Business consultant/change manager/project manager

Helped Öresundskraft create an IT strategy for their group. The work was carried out and following that, the activities that need to be performed for their IT vision, which we developed during the autumn of 2001, to be achieved are being initiated. The goal was to create an awareness around IS/IT and to get the group to use IS/IT to create customer value and provide better service for their customers and suppliers as well as other stakeholders. The work is carried out with the help of surveys and interviews as well as together with a working group appointed by parts of Öresundskraft's management and process owners. 1

Perform Diagnostics (screening) and Business Cases for clients to give them a basis for deciding what creates value for the business. The company consisted of me and two experienced senior employees. 1

2002 - 2002, QuickWise, Malmö, Stockholm, London, Nottingham, Project Manager

Project manager for the implementation of new infrastructure, email management, and CRM for better collaboration between QuickWise offices in Malmö, Stockholm, London, and Nottingham. 1

2002 - 2003, Deva Consulting Group, Malmö, Business consultant/change manager/project manager

As a subcontractor to them, I have developed a method we call "Diagnosis". The method means that we offer clients a short and intensive package of interviews (up to 10 interviewees within or outside the company), which leads to providing answers in the form of a number of proposals that can resolve the situation the client finds themselves in. 1

2003 - 2004, Home Entertainment , Malmö, Project Manager

Head project manager for the development of the system specification for the implementation of a new business system. This as an objective consultant between the customer and its system supplier. Home Entertainment offers CDs and other goods within music and film based on a subscription. 1

2005 - 2006, Sony Mobile (SonyEricson), Lund, Senior Project Manager

- Introduced self-service solutions into the consumer portfolio, reducing support costs and improving customer satisfaction. 1
- Expanded responsibilities into After Sales Planning and Portfolio Business Management, aligning customer service strategy with corporate objectives.
- Delivered innovative customer service models that strengthened SonyEricsson's competitive edge.
